

Currently the newest Lukoil gas station is under construction near Kumanovo on the highway to Skopje.

This Lukoil gas station will be the only one on the Balkans, if not in Europe that is built on two levels. The lower level, ie highway Kumanovo - Skopje will have 3 dispensers for liquid petroleum products and liquefied petroleum gas and the upper level that exits on the village path would have one dispenser for liquid petroleum products and liquefied petroleum gas. This gas station is expected to be put into use this month.
