The new Lukoil gas station in the region Machja Glava has experienced the inauguration.

Andrei Kuku, the director of Lukoil Macedonia, said that this is just the 17th gas station here in Macedonia from the 40 planned. We are talking about the biggest and most modern gas station ever built in Macedonia. This oil station is built on 6000 square meters. Built on two levels, the highway E75 on the one side, and the rural road Romanovce-Kumanovo on the other side.

Below take a look at the photos taken during the construction.
